**How your images, documents and history may be used.**

....., as a member of the American College of Clinical Thermology Inc, (ACCT) is currently compiling a database of case studies for use in future statistical analysis, case studies for teaching purposes, correlational studies and an image base for publicity and public education with known, accurate case histories.

Your identity (including information that could be suspected of leading to your identity) remains completely confidential, with only the case reviewers of the ACCT ever having access to your name (to verify any facts regarding your case).

No other practitioner or organization will request copies of your records, or approach you directly for further information or ask you to participate in any other studies.

Any copies of test results etc. that are passed on to us as a part of your case study will be edited to remove your name, address and any other contact or identity details before being used further.

We thank you for your help. Your contribution is very much appreciated and not taken for granted.
